RE: RESULTS FROM SAMPLING OF THE SELECT PILES AT THE FORMER SATRALLOY SITE

Dear Mr. Hagen:

Golder Associates Inc. (Golder) completed sampling in accordance with the *Sampling Plan for Selected Piles at the Former Satralloy Site* dated June 11, 2013 and approved by you via email on June 21, 2013. The two laboratory reports with the TCLP results are attached. None of the TCLP results exceeded hazardous waste criteria. Therefore, in accordance with Section 6 of the *Interim Action Workplan for the Former Satralloy Site* approved by Ohio EPA, these piles will be managed on-site as non-hazardous. In particular, Cyprus Amax plans to move some of the piles that are interfering with interim action activities starting September 4, 2013.

Sincerely,

GOLDER ASSOCIATES INC.

Lee K. Holder, P.E.
Associate Engineer, Project Manager
