Dear Kevin,

On behalf of Cyprus Amax Minerals Company, per our telephone conference call this morning, Cyprus Amax is withdrawing Amendment #7 to the IA Workplan, which proposes a Focused Feasibility Study for the lowland slag. As agreed this morning, instead Cyprus Amax will prepare the full Feasibility Study per the COPI in parallel with interim action work. We will submit a new amendment to the IA Workplan for moving slag to the Former Mine Area. This new amendment will include submission of a design of the proposed slag repository for OEPA review and approval.
